

# Task 8 SSL Annex Database update

---

Carsten Dam-Hansen

3 November 2021, zoom meeting

# Overview

---

- Third term plan
- Database status
- Example of EU endurance data
- New photometric dataformat
- Plan for next 6 months
- Expert input and discussion

# Third term plan

## Task 8. SSL Annex Product Database

**Task Leader: Carsten Dam-Hansen, Denmark**

### Objectives

To maintain and expand an internal benchmarking database of SSL products to enable member countries to share performance data and test results for LED lamps and LED luminaires and LED modules. This database would be used internally by SSL Annex member countries, but may also be used in public reports if it is presented as anonymous data (i.e., does not identify brands, models). The database will be populated with test data provided on a voluntary basis from member countries, and/or may also include other sources of data if deemed appropriate by the Task Leader.

MAM	JJA	SON	DJF	MAM	JJA	SON	DJF	MAM	JJA	SON	DJF	MAM	JJA	SON	DJF	MAM	JJA	SON	DJF

- Making a common structure and storage for data and file sharing that is as useful for us to save and analyse data

# Status

- Database structure done and documentation available. Database and analysis tools on a secure share site hosted by DTU: [https://share.dtu.dk/sites/SSL-Annex-DB\\_278500/SitePages/Home.aspx](https://share.dtu.dk/sites/SSL-Annex-DB_278500/SitePages/Home.aspx)
- Documents are stored in folders, and are versioned so that we keep track of older versions.

'share.dtu.dk > sites > SSL-Annex-DB\_278500 > Shared Documents > Database

- Excel database files with identical structure allowing for analysis across the files (excel, power pivot, matlab)

# Status Data

---

## Data entered

- Lighting facts
- DLC
- Der LichtPeter TLM
- DTU TLM measurements, **Longterm testing, LM-84 and EU endurance**
- SEA data, 2019, SPD data

## In process

- SEA 2020, **EU endurance**
- Australia (35 models, average of results) TLM, **EU endurance**

# Longterm testing Data

## Structure and data

- DTU Fotoniks own longterm testing data included (show excel)
- List of product IDs the artefacts and the test they have been subjected to

# New photometric dataformat

## Data for luminaires

- generic and expandable replacement for IES LM-63 (.ies), EULUMDAT (.ldt); LID, power, luminous flux, CCT, CRI
- IES TM-33-18 new structure based on xml

```
<?xml version="1.0" encoding="UTF-8"?>
<Root xsi:noNamespaceSchemaLocation="GldfSchema.
<Header />
<GeneralDefinitions>
  <Files />
  <Sensors />
  <Photometries />
  <Spectrums />
  <LightSources />
  <ControlGears />
  <Equipments />
  <Geometries />
</GeneralDefinitions>

</ProductDefinitions>
</Root>
```

- Relux and Dialux; Global Lighting Data Format, <https://gldf.io/>, uniform and comprehensive data format for the lighting industry
- DLC LUNA , requires TM-33-18 .xml document for LID, SPD
- Action: follow this development to see if this is useful for task 8
- New Danish project on this and collaboration with GLDF

Table 10. Light Source Fields

Element Description	Element Name
Quantity	Quantity
Description	Description
Catalog Number	CatalogNumber
Rated Lumens	RatedLumens
Input Wattage	InputWattage
Power Factor	PowerFactor
Ballast Factor	BallastFactor
Tilt Angles	TiltAngles
Correlated Color Temperature (CCT)	ColorTemperature
Color Rendering	ColorRendering
Duv	Duv
S/P Ratio	SPRatio
Data Generation	DataGeneration
Luminous Data	LuminousData
Radiant Data	RadiantData
Photon Data	PhotonData
Spectral Data	SpectralData
Illuminance Data	IllumData
Irradiance Data	IrradData
Photon Flux Density Data	PFDData
Spectral Irradiance Data	SpecIrradData
Channels	Channels
Emission Areas	EmissionAreas
Emitter Center	EmitterCenter
Regulatory	Regulatory

# Plan and Round the table

---

## Plan for next period:

- Import SEA data for EU endurance testing (coll. with Christofer)
- Import SEA data + TLM for all years available (coll. with Christofer)
- Import Australian data (coll. with Steve/Gillian)
- Find new storage for the data (sharepoint and excel not a good solution as it grows)
- Follow the development of new photometric data format (xml)
- Make analysis and short report on longterm testing, EU endurance
- Make analysis and short report on PstLM and SVM
